

GLI SCIVOLI

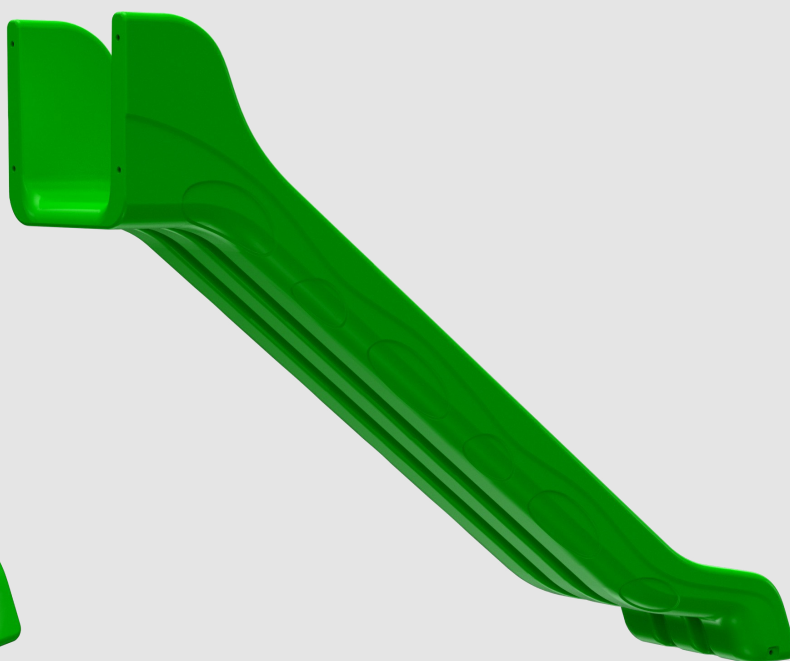

I nostri nuovi scivoli, sono realizzati in polietilene a stampaggio rotazionale. I vari modelli a onda, a tubo e a spirale oltre ai classici dritti, riescono a soddisfare varie altezze; h.95 - h.145 - h.195 - h.245 cm. Solidità strutturale, colori brillanti e resistenti agli UV, gli scivoli risolvono varie necessità sia di natura estetica che funzionale. I nostri uffici sono a vs. disposizione per qualsiasi informazione tecnica e di disponibilità del prodotto.

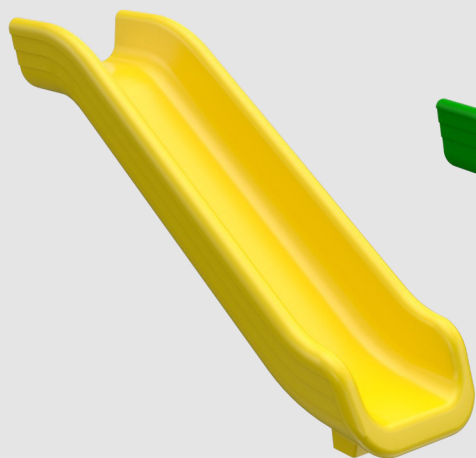

COD **SL95D**
Scivolo Dritto h**95 cm**
Straight Slide
